Naturally Inspired

Rubber Latex is a natural product extracted from the sap of rubber trees (*Hevea Brasiliensis*).
Organic product biodegrades at about the same rate as an oak leaf.
Latex harvesting helps prevent deforestation.
Rubber trees combat greenhouse gases slowing global warming.

Design by Bella Vollen & Guido Verhoeef - Austria 2010

Since 1938 Sempertex® offers a complete range of balloons specially designed to fulfill and satisfy all needs of the balloon art. Made of 100% pure natural biodegradable latex, free of fillers or any cost reducing agents, and manufactured with our own designed formulations, Sempertex® assures the delivery of top quality products. Our quality commitment is to deliver a 98% perfect products, although most is close to 100%. In terms of Price & Quality, Sempertex® offers the best available cost benefit alternative in the world.

All Sempertex® balloons are made of our soft, easy-to-handle latex, making them durable and long lasting with a low burst rate. Fingers count too, generous long and soft necks allow you to enjoy watching the final result with a pleasant feeling in the hands and ready for the next job. With a palette of 85 colors to choose from, Sempertex® balloons will work with any color scheme. Colors correspond to a PMS color value, therefore it is possible to design and work with color precision. To help you and your costumers picture our colors, we define them in four ways: The Name, The Description, The PMS code and by giving examples of items and colors that are similar. This makes Sempertex® colors easy to identify, match and choose. This information is also available in our web site: www.sempertex.com

Balloons Specifications & Helium Chart

All R-12 Satin Pearl and Metallic Balloons are produced on super-sized forms; while the uninflated balloons look larger than other balloons of the same sizes, they are designed to inflate to the same sizes as Fashion, Pastels, Crystals, and Neon colors.

The listed average inflation sizes, lift ability, flying time, and numbers of balloons per helium tank are conservative average.

Actual flying times vary depending on temperature and atmospheric conditions.

Balloon Type	Inflated Diameter		Lift Ability	Gas Capacity	Average # 242 cubic ft. tank	Average Flying Time
